

Andreas Langenhagen

Computer Science MSc. Graduate from Technische Universität Berlin.
Polyglot Software Engineer with >10 years Post-Graduation Work Experience.
From Cloud and Kubernetes to Bare Metal.
Agentic Coding with LLMs.
Led & supervised Coworkers, Students and Interns across Teams.
Clear Communication and Connections across Silos.

Age 38 • German Nationality 
Berlin, Germany

Core Expertise & Technologies

AI LLM Agents (Claude, OpenAI), async Python, FastAPI, Pydantic, OpenAPI, OpenFGA, Bash, Linux, AWS, Azure, Docker, Kubernetes, NATS, SQL, Git, C, C++, Golang, Industrial Robots (ABB, FANUC, KUKA, UR, Yaskawa)

Professional Experience

• Staff Engineer at Wandelbots (wandelbots.com) August 2024 – today

- Stack: distributed Kubernetes Systems, async Python, Full-Stack TypeScript, Golang, Azure, AI LLM Agents
- co-author and maintain Developer Tools, OSS and internal Projects in the Wandelbots NOVA Stack
 - Wandelbots NOVA SDK github.com/wandelbotsgmbh/wandelbots-nova
 - Wandelscript Programming Language github.com/wandelbotsgmbh/wandelscript (archived)
- built and own Microsoft Azure / Fabric ETL Pipeline to extract Robot Data Streams in Realtime
 - integrated into the NOVA OS Product
- designing and building NOVA Cloud Functionality, Infrastructure, Authentication and Authorization via Entra, Auth0 and OpenFGA

• Development Manager at Micropsi Industries (micropsi-industries.com) March 2024 – July 2024

• Senior Python Engineer October 2021 – March 2024

- modernized and simplified Systems that control Collaborative Robots via AI, from Infrastructure to Industrial PCs
- as a People Manager, supervised and mentored 2 Coworkers and an Intern, unblocking and liaising with C-Level
- drove several Cross-Functional Projects, e.g.: Edge-Cloud Synchronization and Duplication of Robot Skills
- adapted System and Processes for Industrial Hardware Platforms; developed custom Linux OS for Edge Devices
 - reduced Edge Device Provisioning Time from ~30 Minutes to ~8 Minutes
- owned Features, Epics, Projects and Releases
- hardened and refactored the Codebase across the Stack
- served as both Mentor and Mentee in the Project A Mentoring Program; focus on AWS

• Senior Python Engineer at Momox (momox.biz)

August 2020 – September 2021

- built Event-Driven, Domain-Driven distributed Warehouse Software and maintained Legacy System
- evaluated internal Workings and drove the Software-Side of the 2020 Leipzig Warehouse Audit to pass
- onboarded >800 new Fashion Brands into Momox Databases across all IT Services (Fashion Dpt.)
- migrated Codebase, enabled Insights into Data, fixed Bugs, improved Processes

• Python Backend Engineer at CeleraOne (celeraone.com, acquired by Piano: piano.io)

November 2018 – July 2020

- built and maintained SaaS Paywall / Identity Middleware on distributed on-premise Systems, serving 14+ Publisher Tenants incl. Axel Springer, Süddeutsche Zeitung, NZZ, Tamedia and Media Pioneer
- automated and streamlined internal Processes, reducing ~5 Hours manual Work per Week to few Minutes
- introduced automatic Code-Quality checks via Gerrit CI, rolled out across all Repos
- mentored 2 Trainees and 2 Students, both Students and one Trainee got hired full-Time
- moderated Meetings

Professional Experience

- **Software Engineer at HERE Technologies (here.com)**

March 2016 – October 2018

- built C++ SDK in the Automotive Dpt.; focused on Cloud-based Data Synchronization, later Mobile SDKs
- shipped SDK & Reference App for Embedded C++, Android and iOS; owned Build Systems, CI and Testing
- wrote Test Servers for CI-based Testing
- reduced CMake Configure Time from ~196 Seconds to ~90 Seconds for our Mobile SDK

- **Research Assistant at DAI-Labor / Technische Universität Berlin (dai-labor.de)**

January 2011 – February 2014

- built 3D Smart Health Application and Prototypes; Java, C++, C#, HLSL, DirectX, OGRE, XNA and Unity
- developed Gesture Detection and Image Processing
- represented Projects at CeBIT in 2011, 2012 and 2013

- **Internship at Brückenschläger Web Design (now Devolute: devolute.org)**

August 2008 – October 2009

- early Startup; Web Programming, Design, Linux, C, Ruby on Rails, Git

Higher Education

- **Technische Universität Berlin**

April 2012 – July 2015

- studied Computer Science with Focus on Machine Learning, Computer Graphics, Computer Vision and Economics
- graduated with MSc. in Computer Science

- **Technische Universität Berlin**

October 2007 – March 2012

- studied Computer Science with Focus on Agent-Oriented Systems, Computer Graphics and Economics
- as Bachelor's Thesis created a functional, extensible 3D Multi-Touch Smart Home Management Application in Java; achieved the highest Grade
- graduated with BSc. in Computer Science

Side Projects (Selection)

- **Experiments and Tutorials (github.com/langenhagen/experiments-and-tutorials)**

- personal Sandbox for staying current across Languages, Libraries and Idioms

- **bmenu (github.com/langenhagen/bmenu)**

- fast dmenu-inspired Picker Menu for GNOME / Mutter / Wayland, written in C

- **Recipes Blog (langenhagen.cc/recipes)**

- personal Recipes Collection, maintained over Years
